

Physical Therapy Innovations, Inc. is a privately owned Physical Therapist run company that survived the worst of the COVID19 pandemic without layoffs and any staff member infections. We are now recovering at a rate of 5% a week and reopening up our satellite locations and could use Physical Therapist candidates with strong work ethic, a passion for healing others, and a team-oriented approach.

All our Clinicians found that pitching in their other talents during the pandemic helped our business survive and now thrive. If you can bring a creative ownership spirit to our practice and be involved in its growth and development, we would love to have you come in for an interview!

We are seeking a fulltime physical therapist licensed in the state of California. New graduate or experienced, Spanish speaking a plus. Our position opens 4/01/2021. No fooling!

Our clinic is manual therapy based, with therapeutic exercise development, Pilates based rehabilitation, an aquatic physical therapy that will hopefully reopen in the Fall of 2021 once social distancing becomes less of a concern. We only use licensed clinicians for treatment. Our clinicians average 10 patients a day. We do supervise doctoral PT residents.

We offer all the basic benefits paid individual medical dental vision and paid family medical, individual professional liability, FSA, HSA, life insurance and more. We are an equal opportunity employer. We offer a matching 401K at 4% after a year of employment. PTO is about 24 days a year, vacation and sick time start accruing after three months of full-time uninterrupted employment. Continuing Education tuition is up to \$1600 upon approval.

Starting salary is negotiable but starts at \$85,000 and up. There can be monthly performance bonuses when certain census goals are reached.

Please send a cover letter and resume to allenling61@gmail.com
